Shelby

Shelby Cobra 427 S/C

The Shelby Cobra 427 S/C was first released in 1965, driven by Carroll Shelby's ambition to produce a high-performance American sports car that could rival European models. Shelby, an accomplished racing driver and visionary entrepreneur, saw potential in combining a lightweight British AC roadster chassis with the powerful Ford® V8 engine. His relentless perseverance and track record convinced Ford Motor Company to collaborate on the project. The result would go on to dominate the racetracks and become a lasting symbol of American automotive mastery.

A defining part of racing history

As both racing driver and designer, Carroll Shelby is a legend. When asked "What's your favourite car?" he would reply, "The next one."

Eager to get people excited about the Cobra, he was concerned he wouldn't be taken seriously with only one car to show. So, he repainted the first car several times to make it look like he was already successful and had several of them. With its aluminium body, robust Ford® 427 V8 engine and superior power-to-weight ratio, the Cobra series earned a wealth of championships and records, including a World Sportscar Championship in 1965, and clocking 198 mph/318 kph at 24 Hours of Le Mans in 1967.

From the LEGO® Icons design team

Our partners on this model, Shelby American, were incredibly kind when guiding us through the history of the Shelby Cobra 427 S/C. True to LEGO® Icons, this model sports the characteristic Cobra livery, gaping 'mouth' and roll bar. Both the sides and rear wings are angled, and we created new elements and combined advanced building techniques to capture the curvaceous silhouette. It even includes an opening bonnet, doors and boot, working steering, a detailed engine compartment and interior, and even Carroll Shelby's signature on the dashboard!

55

Carroll Shelby famously signed many glove compartment covers of Shelby cars.

56

57

Legend has it that Carroll Shelby would tape a \$100 bill to the car's dashboard, promising that anyone who could reach it before the car hit 60 mph/~100 kph could keep it. Allegedly, the car's acceleration pushed passengers so far back in their seats, no one was ever able to reach it and claim the prize!

The 427 S/C Cobra is named after the number of cubic inches in the car's beating heart: The Ford® 7.0 L engine.
