Product descriptions

The Inter Phone is a Bluetooth headset for motorcyclists and passengers who want clear and reliable wireless communication whilst riding. This headset is compatible with Bluetooth mobile phones and can be used with any type of motorcycle helmet.

1. Phone button
2. Power / Intercom button
3. Charger and headset dock
4. Headset plug
5. Microphone
6. Earpiece
7. Cable input interface

Key features

- (1) Wireless headset for Bluetooth-enabled mobile phones with a range of up to 10 metres.
Bike-to-bike intercom for rider & passenger or two separate bikes up to 800–1000 metres
 - Up to 10 hours of talk time when connection to a mobile phone
 - Up to 8 hours of talk time when using the intercom
 - Up to 300 hours of standby time
- (2) Call, answer, reject, hang up
- (3) Receive automatic calls
- (4) Support for audio transmission
- (5) Supports redial
- (6) FM radio function
- (7) Enjoy music from your mobile phone via A2DP or connect to GPS
- (8) Control mobile phone music via AVRCP: forward, reverse, play, pause

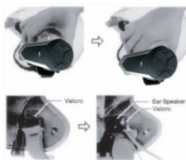

- (9) Automatic switching between Bluetooth mobile phone, hands-free kit, stereo music
- (10) With DSP echo cancellation and noise reduction technology, crystal-clear voice quality at high speeds is guaranteed
- (11) The button panel is waterproof, whilst the audio cable connects to MP3 players, GPS, walkie-talkies and so on

Use the headset chip mount with BefestigungsachseTTe

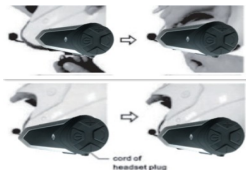

1. Using the screwdriver provided, loosen the screws on the clips enough to allow the clip to slide on both sides of the helmet shell.
2. Make sure you place the clip underneath the helmet
3. Adjust the clip until you find the best position for your helmet
4. Tighten the screws to secure the clip

Fitting the intercom

4. Take your Inter Phone headset and slide it into the slots in the headset clip mount. Make sure it is perfectly fitted and locked in place by trying to pull it outwards.

2. Now you need to attach the speaker and the microphone arm to the inside of the helmet. Take the Velcro pad that the speaker will be attached to and test it to find the best position to secure it. The Velcro pad should be attached at ear level in the ear cup pocket. You will need to put the helmet on a few times to find the optimal position for applying the pad. Once the correct position has been found, remove the protective strip and apply the Velcro pad.

3. Next, take the earpiece and attach it to the Velcro pad. Guide the microphone arm downwards to where your mouth will be. As the microphone arm is flexible, you can adjust it so that it sits in the optimal position in front of your mouth. Some helmets have removable padding; if yours does, it is advisable to route the speaker and microphone underneath the padding.
4. Make sure you align the pins and connect the headset plug to the headset socket. The plug can only be inserted in one position.
5. S e c u r e the headset plug's cable inside the helmet. Tuck any excess cable into the helmet. Make sure only a few centimetres of the cable are left hanging out. You have successfully installed

Note: Another option for mounting the Inter Phone.

You can use the Velcro fastener (with 3M) directly to mount the intercom on the edge of the helmet. See the following images.

Removing the Inter Phone

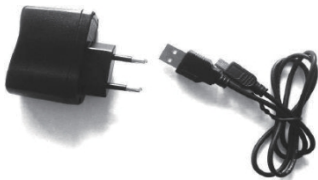

Remove the BT-S3

Inter Phone by pressing the release button as shown, then lift the Inter Phone module upwards

Aufladen des Headsets

Das AC & USB Ladegerät

Note: Different countries may have different adapters

Before using this device, please charge the headset using the charger supplied. Please ensure that the battery is fully charged when using it for the first time.

We have provided you with the option to charge the system via your computer's USB port, or if you are travelling, you can use the multi-voltage USB power adapter supplied.

The charging cable has a small USB plug for the headset and a large USB plug for the computer or power supply; please ensure the USB plug and socket are correctly aligned before connecting

- 1) Plug the USB plug of the charging cable into the USB socket on the headset. You can charge it either via a computer or the power adapter.
- 2) During charging, the red LED on the headset module lights up; when charging is complete, the red LED goes out. A standard charge from a low battery takes approx. 4 hours.

Note: If you do not use the headset for a month or more, please charge it at least once a month to protect the Poly-Li battery. (Damage caused by incorrect charging is not covered by the warranty).

Putting the device into standby mode:

Press and hold the Power/Intercom button at the end of the device. After 3 seconds, you will hear a "beep" and the blue LED will start flashing. Release the button and the device will now be in standby mode.

Switching the device off:

Press the Power/Intercom button for 5 seconds or until you hear 2 "beeps" and the lights go out.

To pair with your Bluetooth-enabled mobile phone:

When the device is switched off, press and hold the power button at the end of the device. Keep holding the button until a RED AND BLUE light starts flashing. This usually takes about 5–8 seconds. Do not let go until you see the blue light

. You will also hear a "beep" sound when the device enters pairing mode. On your phone, search for and attempt to pair with the device whilst it is flashing red and blue. If prompted, the pairing code is 0000 and you should pair your phone with the device.

Phone controls:

- To answer a call – Briefly press the phone button
- Auto-answer – Depending on the phone, the device will answer after 8–16 seconds
- To reject a call – press and hold the phone button until you hear a "beep" (approx. 2 seconds)
- To end a call – While the call is active, press the phone button once
- Redial - In standby mode, press and hold the Phone button for 2 seconds until you hear a "beep"
- To answer a phone call during an intercom call – Press and hold the Phone button for 2 seconds until you hear a "beep"

NOTE: Depending on the phone, some or all of these functions may not work or may work differently

Music control:

- Play / Pause – Press the button briefly once
- Next track – Turn the "+" knob and release
- Previous track – Turn the "-" knob and release

To adjust the volume:

Press and hold the "+" button to increase the volume and press and hold the "-" button to decrease it. This function also works for the intercom, music and FM radio functions

NOTE: Depending on your phone, some or all of these functions may not work or may work differently.

To pair 2 devices in Intercom mode:

- When both devices are switched off, press and hold the Power/Intercom button on both devices until both units flash red and blue repeatedly. You must hold the button down for more than 6 seconds and do not release it when you see the blue light.
- Briefly press the Power/Intercom button on ONE of the two devices and that device will search for and automatically pair with the other in Intercom mode. A live call will be initiated. (Intercom starts)

Both Bluetooth devices can be connected to each other.

To pair 3 devices in Intercom mode:

- Follow the procedure above for each combination of the three units (A-B, B-C, A-C).
- Ensure that the third unit is switched off whilst pairing the other two devices.
- Only one connection can be active at a time. Once successfully paired, you can switch between connections by ending an active call and returning to standby mode
- In standby mode, press the Power/Intercom button once for one of the pairings to be called, or twice for the other pairing to be called
- Whether you press 1 or 2 depends on the order in which you paired the 3 helmets, but once paired, the relevant pairings will retain their number

- If this is not the case, ensure that both red and blue light sequences are initiated simultaneously and are close together. Also ensure that other Bluetooth devices are switched off.
- Once you have paired the devices, you do not need to enter pairing mode again. In future, simply put both units into standby mode (blue light flashing) and press the button on one of the devices

Note: If you need to pair two Bluetooth devices for the intercom, you must also connect the mobile phone; please follow the instructions:

1. First, successfully pair the two Bluetooth devices for the intercom (see instructions above), then switch off both Bluetooth devices.
2. Switch on one of the Bluetooth devices, switch on the mobile phone's Bluetooth, and allow the mobile phone to successfully connect to the Bluetooth device.
3. Switch on the other Bluetooth device; next, you simply need to press the Power/Interroom button on the Bluetooth device (either of the two is fine), which

- A presses the Power/Intercom button once to call B, and twice to call C. B presses the button once to call C, and twice to call A. C presses the button once to call A, and twice to call C.

To reset the pairing memory

- If you are having problems pairing, it is best to reset the pairing memory
- Put the device in question into standby mode. Press the Power/Intercom button for 3–5 seconds until you hear a “beep”.
- Release the button when you hear the tone. (The device will switch off)
- Restarting will clear the memory. (Repair again)

How to start the FM radio:

After switching on the device, press the button for 2 seconds (until you hear "du"), release the button, and the FM radio will start.

Press the “+” or “-” button briefly to tune the channel.

When the FM radio starts, press the phone button twice; the FM will stop.

Note: To get the best performance from the FM radio, please follow these instructions:

- 1: Ensure the headphone cable is fully extended.
- 2: Try to listen to the FM radio outdoors or near a window.

How to use the audio cable

The audio cable features a cable input interface, allowing it to connect to MP3 players, GPS devices, mobile phones and so on.

Please note: The walkie-talkie audio cable can also be plugged into the cable input port; it can connect to a walkie-talkie, allowing a group of people to communicate simultaneously. (The walkie-talkie audio cable must be purchased separately).

The cable adapter varies depending on the model of the walkie-talkie.
