Welcome to use

Dear pet owner:

Thank you for choosing our UFO retractable leash generation 2. Based on the breaking through first-generation, we have gathered many inputs from our users. Through more than 30 improvements, we are now bringing to you: innovated hands-free design, improved retraction smoothness, completely re-designed locking button and more colors&configurations. We will be truly honored if our product can bring you and your pets a better experience when going out.

If you have any questions or suggestions, please contact us through the following methods:

Thanks again for your use.

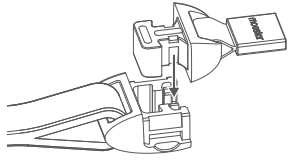

Common functions

Elastic band installation

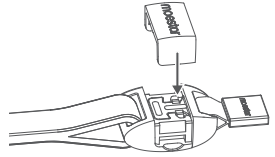

Remove the cover on the female buckle at one end of the elastic band.

Press the male buckle at the end of the retractable belt from top into the female buckle on the elastic belt.

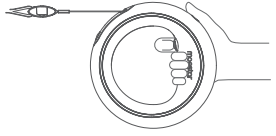

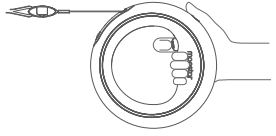

Reinstall the cover to complete the installation of the elastic band.

Locking button

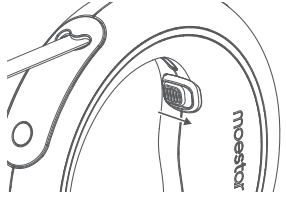

Temporary lock
The temporary locking can be realized by directly pressing the locking key located in the inner circle of the leash handle, and the retraction can be restored when the locking key is released.

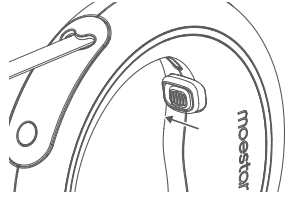

Use of lock key

Permanent lock
Press the lock button and slide the paddle on the lock button to the right to achieve permanent lock. Sliding the paddle to the left to cancel the permanent lock and restore free retraction.

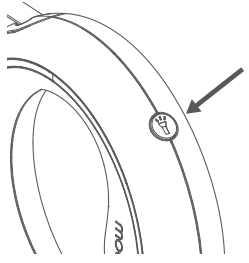

Lighting system

Turn on the lights
Lightly press the button once on the rim of the leash handle turn on the light. Press the button again to turn off the light.

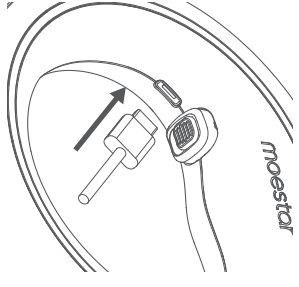

Turn on the breathing light
Press and hold the button on the rim of the leash handle for 3 seconds to turn on the breathing light. press and hold again for 3 seconds to turn off the breathing light.

Breathing light color change
The breathing light is preset with three colors of red, green and blue. Press and hold the button on the rim of the leash handle for 6 seconds to enter the changing mode of the breathing light. In this mode, the three colors will be changed cyclically. When you like the color, release the button to change it.

Recharge

The traction rope is charged by 5V USB, and any USB interface that provides 5V voltage can charge the traction rope.
