Warning

- The paper tray must be clean. Dirt can jam the print head during printing and cause damage.
- Use alcohol to clean the paper tray and the print head.
- Do not take the printer apart or attempt to repair it yourself. Switch off the printer if it malfunctions.
- Charge the printer in a cool, well-ventilated room. Do not expose the printer to high humidity or high temperatures.
- Keep it away from water.
- If the printer emits strange odours or smoke, switch it off immediately and unplug it.
- Do not drop or shake the printer to avoid damage.
- Do not open the cover whilst it is printing.
- Do not touch the print head immediately after printing, as it will still be HOT.
- Use a soft, clean cloth to clean the outside of the printer.
- High temperatures can result in poor print quality.
- Use Peach label paper to achieve optimal results. Using other labels may result in poor print quality or damage to the printer.
- The durability of the printed labels depends on the quality of the label paper.
- Choose high-quality label paper if you want the labels to last a long time.
- Children must only use the printer under supervision. Store in a clean and dry environment.
- The printer is NOT supplied with an adapter. Use an adapter with a rating of 5V 1A.
- This printer can only be used in non-tropical environments.
- The printer may cause radio interference. Take the necessary precautions.

Connect a printe

1. Turn on Bluetooth on your smartphone
2. Press and hold the power button D to start the device.
3. Open the "Labelnize" app on your smartphone and tap "Not connected".

4. Search for "P21", tap "Click to connect"

Create a new labe

1. Tap "+" to edit the label

2. Tap the "⚙️" button to adjust the label size and paper type

Create a new label

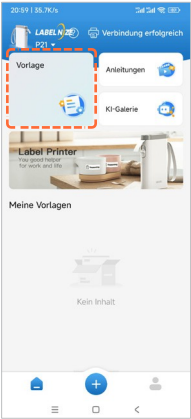

- 3. Tap **"Text"** to enter the text
- 4. Edit the label as you wish using the available functions. Once you have finished editing, tap **"Print"**.

- 5. Select the number of copies and tap **"Print"**

How to select a label for printing

1. Tap "Template"

2. Select a template that suits your needs

How to select a label for printing

3. Tap the template to edit it

4. Tap "Print"

Troubleshoot ing

- **What are the dimensions of the supplied label roll?**

The supplied roll contains white labels measuring 15x40 mm and is located in the paper tray.

- **Do I need to register to use the printer?**

Registration is not required. Registered accounts can save and retrieve label templates.

- **Why is the printer printing blank labels?**

This may be because the label paper is loaded upside down; the labels must be facing upwards with the printed side showing.

- **Why is the printer continuously feeding labels?**

1. This may be because labels or residue are stuck to the sensors on cover A or in the paper tray.
2. This may be because labels or residue are stuck to print head A. The label paper could not be detected.
3. The sensors may be blocked by dirt. Clean the sensors and print head A.

- **Why does the printout look grey or faded?**

Use Peach label paper for best results. You can also try cleaning print head A with cleaning alcohol.

- **Why is the printer skipping a label or printing incompletely?**

1. Check that the label size and the software print template match.
2. Reinsert the label roll and press the feed button D once manually so that the printer can detect the label gap position.
3. Using non-genuine labels may result in poor print quality or mismatched sizes. Please use genuine labels.

- **Why has the printer suddenly stopped printing?**

Certain safety measures have been triggered. The most common reasons are that the printer has run out of paper or the battery is low.

- How can I centre the label content whilst editing?

1. On the right-hand side of the **"Text"** section, you can choose to align the text to the centre, left or right – click on this to adjust the text position within the text box.
2. For other templates or content, you can adjust the position by clicking on it and selecting the **"Align"** option. It can also be moved using your fingers.

LED display

Display	Status

- **Why is the printer printing blank labels?**

This may be because the label paper is inserted upside down; the labels must be facing upwards.

- **Why is the printer feeding labels continuously?**

1. This may be because labels or debris have become stuck on the sensors on cover A or in the paper tray.
2. This may be because labels or debris have become stuck on print head A. The label paper could not be detected.
3. The sensors may be blocked by debris. Clean the sensors and print head A.

- **Why does the print look grey or faded?**

Use Peach label paper for best results. You can also try cleaning print head A with alcohol.

- **Why does the printer skip a label or print incompletely?**

1. Check that the label size and the software's print template match.
2. Reinsert the label roll and press the feed button D once manually so that the printer can detect the position of the label gap.
3. Using non-genuine labels may result in poor print quality or incorrect label sizes. Use genuine labels.

- **Why did the printer suddenly stop printing?**

Certain safety measures have been implemented. The most common causes are that the printer has run out of paper or that the battery level is low.

- **How can I centre the label content when editing?**

1. On the right-hand side of the **"Text"** section, there are options for centring, left or right – click to adjust the text's position in the text box.

2. For other patterns or content, you can adjust the position by clicking on it and selecting the **"Adjust"** option. It can also be moved using your fingers.

The indicator lights mean

Indicator	Status
Flashing Green sound	Charging
Light off	Fully charged
Flashing red light	The print head is overheating or the battery is low; printing cannot be completed
Solid red light	The cover is open or the paper has run out; printing cannot be completed
Steady blue light	Bluetooth connection successful

Portable label printer – facts

Printing technology	Direct thermal
Resolution	203 DPI
Print speed	60 mm/s MAX
Supported paper width	14 mm (12 mm available)
Supported paper types	Gap paper / continuous paper
Connection	Bluetooth
Paper cutting	Manual
Battery	1200 mAh
Charging	USB TypeC
Input	5V 1A DC
Operating environment	5–40°C, 90% RH (non-condensing)
Storage environment	5–40°C, 90% RH (non-condensing)
Expected lifespan	50 km
Product dimensions	79.5 x 30 x 130.6 mm

Warning

- The paper tray must be clean. Any dirt will get caught during printing and damage the print head.
- Use alcohol to clean the paper tray and print head.
- Do not dismantle the printer or attempt to repair it yourself. If any faults occur, switch off the printer.
- Charge in a cool, well-ventilated room. Do not expose the printer to high humidity or temperatures.
- Keep out of reach of water.
- If the printer emits any unusual odours or smoke, switch it off immediately and unplug it from the mains.
- Do not drop or shake the printer to avoid damaging it.
- Do not open the cover whilst printing.
- Do not touch the print head immediately after printing, as it will be HOT.
- Use a soft, clean cloth to clean the outside of the printer.
- High temperatures may result in poor print quality.
- For best results, use Peach label paper. Using other types of label paper may result in poor print quality or damage to the printer.
- The durability of printed labels depends on the quality of the label paper.
- If you need your labels to last, choose high-quality label paper.
- Children may only use the printer under adult supervision.
- Store the printer in a clean, dry place.
- The printer is NOT supplied with an adapter. Use one with a rated output of 5 V 1 A.
- This printer may only be used in a non-tropical environment.
- The printer may cause radio interference. Take all necessary precautions.

Download the app

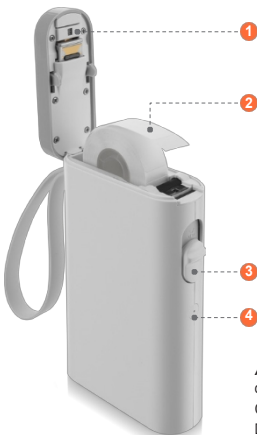

Android and Apple users can search for "Labelnize" in the Google Play Store or App Store and install it. Alternatively, scan the QR code.

Load the paper into the label printer

1. Slide the **2** locking button to the other side to open cover A.
2. Insert the **2** paper roll into the paper tray. Refer to the illustration for the correct position.
3. Unroll the paper sufficiently so that it protrudes slightly from the printer.
4. Close cover A. Press the power/feed button D to calibrate the label and test the printer.

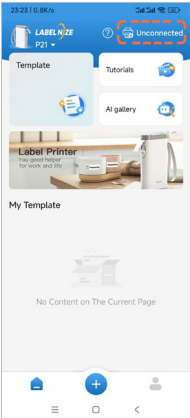

Notes: For best results, use label paper recommended by the printer manufacturer.

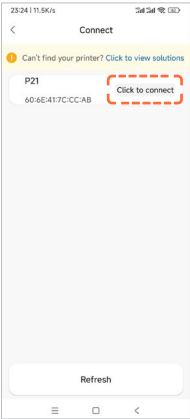

A Cover/print head **2** Roll of label paper
C Cut button
D Power/Feed button

Connect the printer

- 1. Turn on Bluetooth on your phone
- 2. Press and hold the power button to start the machine
- 3. Open the "Labelnize" app, tap "Offline"

- 4. Find "P21", tap "Connect by clicking"

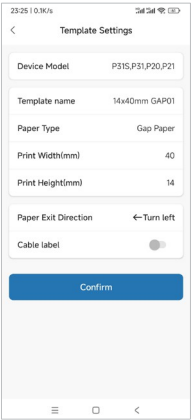

Create a new label

1. Tap "+" to customise the label

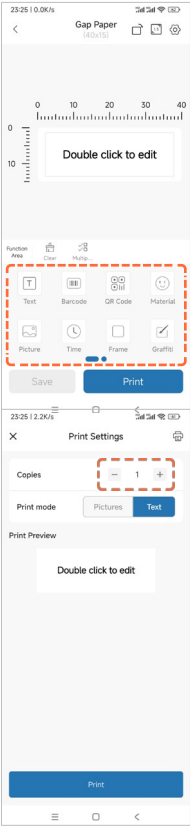

2. Tap the "⚙️" button to adjust the label size and paper type

Create a new label

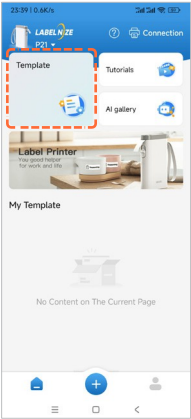

- 3. Tap **"Text"** to enter text
- 4. Customise the label to your requirements using the available functions. Once you have finished, tap **"Print"**

- 5. Select the number of copies and tap **"Print"**

How to choose a label for printing

1. Click on "Template"

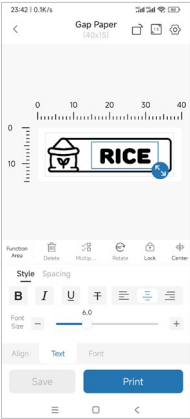

2. Select a template to suit your needs

How to choose a label for printing

3. Click on the template you want to edit

4. Click on "Print"

Troubleshooting

- **What are the dimensions of the supplied roll of labels?**

The supplied roll contains white labels measuring 15 x 40 mm, which you will find inside the paper tray.

- **Do I need to register to use the printer?**

Registration is not required. Registered accounts can save and download label templates.

- **Why is the printer printing blank labels?**

This may be because the label paper is inserted upside down; the labels must face upwards.

- **Why is the printer feeding labels continuously?**

1. This may be caused by a label or residue stuck to the sensors on cover A or in the paper tray.
2. This may be caused by a label or residue stuck to print head A. The label paper could not be detected.
3. The sensors may be blocked by dirt. Clean the sensors and print head A.

- **Why is the printout grey or faded?**

For best results, use Peach label paper. You can also try cleaning print head A with alcohol.

- **Why does the printer skip a label or print incompletely?**

1. Check that the label size matches the software print template.
2. Reinstall the label roll and press the feed button D once manually so that the printer can detect the position of the gap between the labels.
3. Using non-genuine labels may result in poor print quality or inconsistent sizes. Use genuine labels.

- **Why has the printer suddenly stopped printing?**

Certain safety measures are in place. The most common reasons are that the printer has run out of paper or the battery is flat.

- **How can I centre the label text when editing?**

1. On the right-hand side of the "Text" section, you can choose to centre or align to the left, or right-click to adjust the position of the text within the text box.

2. For other designs or content, you can adjust the position by clicking on it and selecting the **"Align"** option. You can also move it using your fingers.

Problem-solving

- **What are the dimensions of the included label roll?**

The included roll contains white labels measuring 15x40 mm and is located in the paper tray.

- **Do I need to register to use the printer?**

Registration is not mandatory, but it is very useful. Registered accounts can save and download label templates.

- **Why is the printer printing blank labels?**

This may be because the label paper is inserted upside down; the labels must face upwards.

- **Why is the printer feeding labels continuously?**

1. This may be caused by labels or residue sticking to the sensors on cover A or in the paper tray.

2. This may be caused by a label or residue sticking to print head A. The label paper has not been detected.

3. The sensors may be blocked by debris. Clean the sensors and print head A.

- **Why is the print grey or faded?**

For best results, use Peach brand labels. You can also try cleaning the print head with alcohol.

- **Why is the printer skipping labels or printing incompletely?**

1. Check that the label size and the software print template match.

2. Reinstall the label roll and manually press the feed button D once so that the printer detects the gap between the labels.

3. Using non-genuine labels may result in poor print quality or size mismatch. We recommend using genuine Peach labels.

- **Why has the printer suddenly stopped printing?**

Certain safety measures have been implemented. The most common causes are the printer running out of paper or the battery being low.

- **How can I centre the label content whilst editing?**

1. On the right-hand side of the "Text" section, there are options for centring,

to the left or to the right – click to adjust the text's position in the text box.

2. For other designs or content, you can adjust the position by clicking on them and selecting the **"Align"** option. You can also move the text using your fingers.
