5

3.6 Connecting in Wi-Fi mode

Wi-Fi name (SSID) and Wi-Fi key is located on the label under the battery.
Step 1: Use the Wi-Fi manager on the Wi-Fi embedded device to select Wi-Fi name (SSID).
From a Windows PC: Right-click Wireless network connection on the task bar and select "View Available Networks".
Choose SSID from the list of available networks.
From a Mac: Computer->System Preferences->Network->Airport, Click "Advanced" to choose SSID from the available networks.
From an iOS device: Settings->Wi-Fi, Choose SSID from the available networks.
From an Android device: Settings->Wireless controls->Wi-Fi settings: Choose SSID from the available networks.
Step 2: Enter the Wi-Fi key when prompted for a security key.

3. Quick Setup

Launch the internet browser and enter <http://192.168.1.1> to refer to the label under the battery to the address bar. Enter the password to log in to the device configuration page.
Default high password: admin.
Log in and click "Settings" to configure the back settings.
Wi-Fi settings:
SSID: Set the Wi-Fi name of this device.
Security: Configure the security mode for Wi-Fi connection.

3. Charging the device

You have two ways to charge your device.
Charge with an adapter: adapter must support four wire line, or it won't be charged!
Connect a USB cable between the device and the head of the adapter and plug it into a power socket to start charging.
When the device is powered off, it takes a maximum of 3 hours before being fully charged.
Charging via USB
You can also charge the device by connecting it to a PC with the USB CABLE.
When the device is powered off, it will take a maximum of 4 hours to finish charging.
Note: In order to protect the battery, when low power LED indicator flashes, charge the device on time.
