

Introductions:

* CC308 Full-frequency detector Almighty is a new and never used detector. It is multi-angle adjustable, keep wide range detection.

Features:

- * New and high quality
- * Environmental economy, high temperature resistant, corrosion resistant
- * Convenience in installation
- * Super environmental suitability and stability
- * low-voltage prompts, built-in rechargeable battery Laser Detection: Windows host can be seen through the eyes of all within sight of the camera facing the camera
- * With a uto-detection function, the host to carry, when the live environment of eavesdropping devrce, pinhole cameras, Casino gambling fraud, etc..., the host will be in your auto-body vibration?prompts risk
- * With a signal strength indicator lights that can quickly find the signal at source
- * Adjust potentiometer adjustable sensitivity. (Greater sensitivity to widen the scope of or reduce the sensitivity to detect reduced Detection range) quickly identify the waves at source
- * Detection mode: 1.Laser detection, 2.Vibration (Mute) detection, 3.Beep detection, 4.LED
- * display detection. 5. Headset
- * Wireless Sweep: frequency detection range (1MHz-6.5GHz)

Instructions for use:

A:detection of camera lens

- 1) turn the power switch,power indicator light(blue hair)
- 2) click the laser switches,instruments back 6 LEDlight started lashing
- 3) up and down and move around the instrument,laser scanning of the surrounding environment,eye observation of the host window.If the front of a cameralens,you will find a very strong bright spot in the flicker
- 4) if a continuous hold switch,LED flashes every 2 seconds,the frequency would be fasher a class.this then the first four panel status indications Will flash about.A total of eight options,prefer ences can be asapted to all types of people
- 5) and then click the switch to turn off the laser scanning

B:detection of radio waves(wireless camera/listening device,etc)

a: sound detection:

- 1) turn the power switch to the middle position,power indicator light(blue hair)
- 2) move around,if the flashing red light,there are audio cues that have emission source .The signal became stronger when 4 LED light at the same time,sound,great changes will become faster.
- 3) Pulled out the antenna,adjust potentiometer to the maximum,can expand your search.
- 4) And gradually shorten the antenna,reverse adjustment otentiometer in order to reduce the detection range,can eventually find the emission source.
- 5) Insert the headset can also be used.

b: silence detection(vibration detection):

- 1) will be pushed to the top of the power switch,power indicator light(blue hair)
- 2) there is the signal,only a flashing light and vibration
- 3) other actions with the a

C: Compass

This instrument in particular to increase this feature, for the professionals is very important

D: Battery low-voltage Tips

When the built-in battery voltage is low, the first four panel status indicator will stop flashing, or, should be suspended probe

Specification:

- * Laser detection Camera distance of 10cm-10m (the naked eye can identify red flashing)
- * Radio detection of camera range 5cm-10m (according to the camera decided to transmit power distance)
- * Power in the 50mv-200mv detection range 30-50cm
- * Power in the 300mv-600mv detection range 100-200cm
- * Power in the 800mv-1200mv detection range 300-800cm
- * Power Built-in lithium polymer battery 450mAh
- * Current Consumption: 8mA
- * Probe laser wavelength of 920nm
- * Receive frequency range: 1MHz-6500MHz
- * Special dedicated optical lens filters
- * Material: ABS
- * Size: 93mm x 48mm x 17mm
- * Weight: 58g

Package content:

- * 1 x CC308 Full-frequency detector Almighty
- * 1 x Earphone
- * 1 x Charger US Plug
- * 1 x User manual
